- * ran w/ 2 DAQ units w/ ground loops
 $0 \pm 8 \times 10^{-11}$ false asym
with 2 cables
- * eliminated all but T_ϕ coupling.
- * see cross-talk from T_ϕ injected.
- * before decision to go ahead with single chassis:
 - optical isolator between fake T_ϕ
 - check that not losing phase (one pulse in 10^8)
