

Effective Study Habits

Firstly, come to class and ask questions whenever you dont understand something.

Secondly, solve all the concept questions at the end of the chapter in your textbook.

Thirdly, seek out the most difficult numerical problems in the text that I have not assigned as homework, and do them.

Remember, you should be studying at least 12 hours a week *outside class hours*.

Last but not least, come to office hours and ask me questions on anything to do with the course.

My office hours are MWF 11-12 and Tuesday 12-1pm. If you cannot make any of these hours email me and we will set up a mutually convenient time.
