

## PRACTICE ASSIGNMENTS

One of you just pointed out to me that the Hybrid textbook that you purchased has only concept questions but not numerical problems. To help you practise I will put all the numerical questions in the text on Webassign. However, they will not be graded.

When you log in to webassign, you will see two new assignments. One is called Homework 2, and this is the one that is actually due and will be graded. (Note also that the due date has been postponed to Friday Sept 7 rather than the original date of Wednesday Sept 5). The other is called Practice Assignment 2, and will not be graded. It is this second one you should use to search out the most difficult problems so that you are fully confident of your ability to solve any problem.

I will do this in future with all your assignments.
